

Forward Looking Statement

This presentation contains forward looking statements. The words "believe", "expect", "anticipate", "intend" and "plan" and similar expressions identify forward looking statements. All statements other than statements of historical facts included in this presentation, including, without limitation, those regarding our financial position, business strategy, plans and objectives of management for future operations (including development plans and objectives relating to our products), are forward looking statements. Such forward looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward looking statements. Such forward looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which we will operate in the future. The important factors that could cause our actual results, performance or achievements to differ materially from those in the forward looking statements include, among others, risks associated with product discovery and development, uncertainties related to the outcome of clinical trials, slower than expected rates of patient recruitment, unforeseen safety issues resulting from the administration of our products in patients, uncertainties related to product manufacturing, the lack of market acceptance of our products, our inability to manage growth, the competitive environment in relation to our business area and markets, our inability to attract and retain suitably qualified personnel, the unenforceability or lack of protection of our patents and proprietary rights, our relationships with affiliated entities, changes and developments in technology which may render our products obsolete, and other factors. Further, certain forward looking statements are based upon assumptions of future events which may not prove to be accurate. The forward looking statements in this document speak only as at the date of this presentation. Genmab does not undertake any obligation to update or revise forward looking statements in this presentation nor to confirm such statements to reflect subsequent events or circumstances after the date made or in relation to actual results, unless required by law.

Building a Business that Transforms Cancer Treatment

Our Core Purpose, Strategy & Vision

Core Purpose

To improve the lives of patients by creating & developing innovative antibody products

Strategy

- Turn science into medicine
- Build a profitable
 & successful
 biotech
 - Focus on core competence

Vision

By 2025, our own product has transformed cancer treatment and we have a pipeline of knock-your-socks off antibodies

Innovation Powerhouse

The Genmab Difference

Proprietary technologies allow us to build a world-class pipeline

Match in-house expertise with strategic partnerships

Strong pipeline of 1st – in-class / best-in-class products

Deep insight into antibody biology & disease targets

Track Record & Growth: 20 Years of Achievement

Revenue: **Expanding Top Line**

2003¹: \$10M 2018: \$455M

Operating Result: Sustainable Profits

2013¹: \$10M 2018: \$208M

Dual-listed in US & DK with 2019 US IPO:

Largest of IPO ADSs by a EU Healthcare Co.; 2nd largest US IPO ever for biotech

Cumulative INDs from 1999

1999¹: 1 To date: 33

Genmab Created Products in Ongoing Clinical Trials

Additional Shots on Goal

R&D Engine

Daratumumab (Marketed as Darzalex)

Reshaping Treatment of Multiple Myeloma Across All Lines of Therapy

First-in-class CD38 antibody in development to treat cancer

Collaboration with Janssen: Genmab entitled to tiered royalty of 12-20% of net sales and up to \$444M in certain remaining milestone payments

Approved in certain territories for various multiple myeloma (MM) indications¹

2018 WW net sales by J&J: \$2,025M

H1 2019 WW net sales by J&J: \$1,403M

Multiple Phase III studies ongoing in MM and amyloidosis, and for a subcutaneous formulation

Daratumumab Development Covering All Stages of Multiple Myeloma – Key Ongoing Trials

Covering All Stages of MM: Key Ongoing Trials

Disease Stage	Therapy		Development Phase			
		No. Pts*	Pre-Clinical I	1/11	II	III
High Risk Smoldering	Subcutaneous	360	✓ AQUILA			
	Monotherapy	123	✓ CENTAURUS			
Front line (transplant & non-	Dara + VMP	706	✓ ALCYONE			
ransplant)	Dara + VMP (Asia Pacific)	210	OCTANS			
	Dara + Rd	737	✓ MAIA			
	Dara + VRd	360	CEPHEUS			
	Dara + VTd	1,080	✓ CASSIOPEIA			
	Dara + VRd	690	PERSEUS			
	Dara + R (maintenance)	214	AURIGA

	Dara + I.O. (PD1 & PDL1)	>700	Opdivo® (Ph I/II)			

[✓] Fully recruited Maintenance integrated into some study protocols **Trial currently suspended due to FDA partial clinical hold on all Venclexta studies in MM V Velcade®, MP = melphalan-prednisone, T = thalldomide d= dexamethasone, R = Revillmid®, K = Kvnorile® Pom = Pomalst®

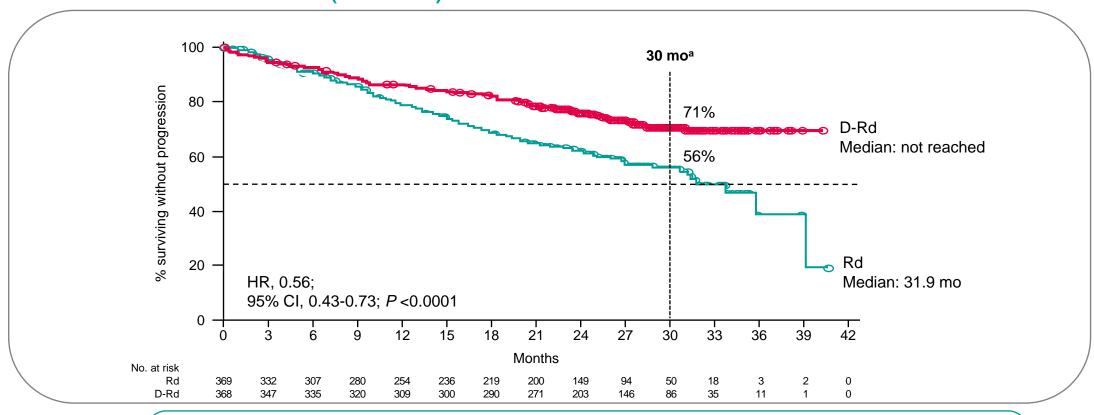

Daratumumab Development: Beyond Multiple Myeloma

Disease	Therapy	Development Phase						
		Pre- Clinical	l	1/11	II	III		
AL Amyloidosis	Dara + CyBorD	ANDROMEDA						
ALL	Dara + SoC chemo	DELPHINUS						
NKTCL (nasal type)	Dara monotherapy	VOLANS						

CyBorD = cyclophosphamide, bortezomib and dexamethasone

Daratumumab Efficacy in Newly Diagnosed Multiple Myeloma Phase III MAIA Trial (D+Rd): ASH Dec 2018

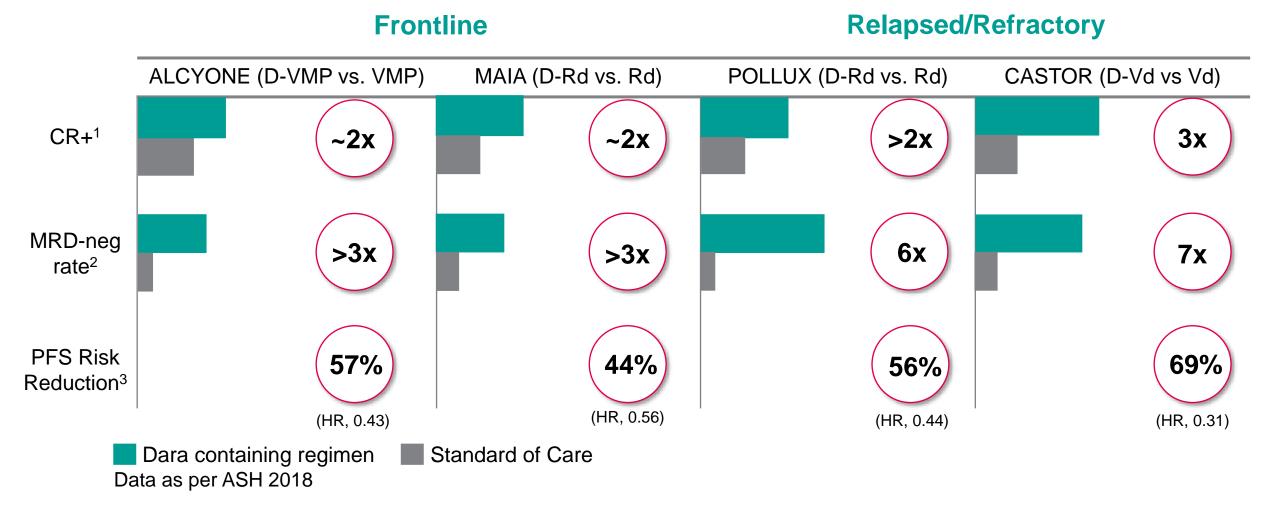

In D-Rd arm:

- 44% reduction risk of disease progression or death in patients receiving D-Rd
- Median PFS not reached
- >3-fold higher MRD-negative rate

D = daratumumab
R = lenalidomide
d = dexamethasone
PFS = progression free survival
MRD - minimal residual disease

Daratumumab: Proving to be the Critical Driver Across Different Combinations & Treatment Lines

Ofatumumab (OMB 157)

Potential in Relapsing Multiple Sclerosis

Human mAb targeting CD20 – well validated target: Collaboration with Novartis

In two clinical Phase III studies (ASCLEPIOS I & II) in relapsing multiple sclerosis (RMS)

ASCLEPIOS I & II: Subcutaneous dosing 20mg every 4 weeks

Positive data from ASCLEPIOS studies announced end of August – met primary & secondary endpoints

Novartis plans to initiate submissions to health authorities by end of 2019

Genmab entitled to 10% royalty payment of net sales for non-cancer treatments

Ofatumumab Development: Key Ongoing Trials Development Phase Multiple Sclerosis ✓ ASCLEPIOS I Relapsing ASCLEPIOS II *Pts who have completed a selected Novartis MS study which dosed ofatumumab 20 mg subcutaneous every 4 weeks

Also marketed as Arzerra in certain territories for various CLL indications^{1, 2}

Genmab entitled to 20% royalty payment of net oncology sales: 2018 net sales of Arzerra by Novartis were \$26M

Tisotumab Vedotin

Genmab's Most Advanced Asset with Potential in Solid Tumors

Fully human Antibody-drug conjugate (ADC) targeting Tissue Factor (TF) in development to treat solid tumors

License and collaboration agreement with Seattle Genetics 50:50

Phase II potentially registrational study (innovaTV 204) in cervical cancer ongoing after encouraging Phase I/II data (innovaTV 201)

Phase II clinical studies in ovarian and solid tumor basket studies; expanding development w/ additional studies planned

Tisotumab Vedotin Development: Ongoing Trials Disease Development Phase Stage Clinical Cervical cancer Recurrent or metastatic innovaTV 204 Recurrent Japan Ovarian cancer Platinum resistant innovaTV 208 Locally advanced or Solid tumors metastatic innovaTV 207 Locally advanced or metastatic innovaTV 201 ✓ Fully recruited

Genmab & SeattleGenetics®

Tisotumab Vedotin in Cervical Cancer Designed to Address a High Unmet Medical Need

Recurrent or metastatic cervical cancer

- Poor prognosis for advanced / recurrent cervical cancer
 - Response rates to standard therapies generally
 <15%
 - Median overall survival 6-8 months
- Data on ORR and survival after progression on 1L bevacizumab + doublet chemotherapy are limited

Conclusions*

- Manageable adverse events and encouraging antitumor activity in patients with previously treated recurrent or metastatic cervical cancer
- IRC-assessed overall response rate of 35% (confirmed and unconfirmed) and confirmed ORR was 22%, with a median DOR of 6.0 months and a 6-month PFS of 40%

Encouraging Antitumor Activity Observed*

	N=55						
	IRC-Assessed ^a	INV-Assessed					
ORR confirmed + unconfirmed (95% CI), %	35 (22-49)	31 (19–45)					
ORR confirmed (95% CI), %	22 (12-35)	24 (13-37)

PD, n (%)	17 (31)	17 (31)					
Not evaluable, ^b n (%)	5 (9)	4 (7)					
DCR confirmed (95% CI), %	56 (42-70)	62 (48-75)					
Median DOR (range), months	6.0 (1.0+-9.7)	4.2 (1.0+-9.7)					
Median PFS (95% CI), months	4.1 (1.7-6.7)	4.2 (2.1-5.3)					
6-month PFS rate (95% CI), %	40 (24-55)	29 (17-43)					

Tisotumab Vedotin

Clinical Development: Ongoing Ph II Studies

Ph II, recurrent or metastatic cervical cancer (innovaTV 204)

(innovaTV 206) study in Japanese population Potentially registrational Up to 100 pts

- Single arm, monotherapy
- Primary endpoint: confirmed ORR
- Secondary endpoints: duration of response, PFS, OS*

Ph II, recurrent or metastatic cervical cancer in combo's (innovaTV 205) Phase I/II study of tisotumab vedotin in combination with bevacizumab, pembrolizumab, or carboplatin in subjects with recurrent or stage IVB cervical cancer

- Primary endpoint: ORR
- Secondary endpoints: Safety, duration of response, time to response, PFS, OS

Ph II, solid tumors (innovaTV 207) Basket study

- Up to 200 pts
- Single arm, monotherapy
- Primary endpoint: ORR
- Secondary endpoints: Safety, disease control rate, duration of response, time to response, PFS, OS

Ph II, ovarian cancer (innovaTV 208) Ovarian cancer, fallopian tube cancer, peritoneal cancer

- Up to 142 pts, incl 12 pt safety run-in
- Monotherapy:
- 2 schedules: every 3 weeks and dose dense
- Primary endpoints: Safety & ORR

Enapotamab Vedotin (HuMax-AxI-ADC)

Potential in Solid Tumors

Fully human ADC, targets tumor-associated AXL

AXL over-expressed on many resistant tumors

Ph I/II study ongoing in multiple solid tumors: expansion cohorts recruiting

ADC technology licensed from Seattle Genetics in September 2014 for an up-front fee of \$11M

Seattle Genetics eligible for milestone payments and royalties, Genmab retains <u>full control</u> of development & commercialization

Enapotamab Vedotin Development: Ongoing Trial

HexaBody-DR5/DR5 (GEN1029)

First HexaBody in Clinical Development

Targets two distinct epitopes on death receptor 5 (DR5), cell surface receptor that mediates programmed cell death

Proprietary HexaBody technology: first HexaBody product in the clinic

100% Genmab owned

Phase I/II study ongoing in multiple solid tumors

March 2015, DR5 antibodies and associated intellectual property rights acquired from iDD Biotech

HexaBody-DR5/DR5 Development: Ongoing Trial

Disease

Preclinical | I/II | II | III

Multiple solid tumors

DuoBody-CD3xCD20 (GEN3013)

Potential for Improved Efficacy & Safety in B-Cell Malignancies

Simultaneous binding to CD3 on T cells & CD20 on B cells observed in preclinical studies

Proprietary DuoBody Technology: first Genmabowned DuoBody product in clinic

100% Genmab owned

Differentiated subcutaneous formulation

Phase I/II study with subcutaneous formulation ongoing in B-cell malignancies

DuoBody-CD3xCD20 Development: Ongoing Trial

DuoBody-PD-L1x4-1BB (GEN1046)

Bispecific Antibody with Potential in Solid Tumors

Bispecific antibody targeting PD-L1 & 4-1BB (CD137)

Potential to provide Genmab with differentiated PD-L1 product

50:50 co-development Genmab and BioNTech

Combines checkpoint blockade with T cell stimulation

Phase I/II study ongoing in solid tumors

DuoBody-PD-L1x4-1BB Development: Ongoing Trial

DuoBody-CD40x4-1BB (GEN1042)

Next Product Candidate Planned for the Clinic

Bispecific antibody targeting CD40 & 4-1BB (CD137)

Potential in solid tumors

50:50 co-development Genmab and BioNTech

Designed to conditionally activate T cells

First CTA filed; Phase I/II study planned in solid tumors

DuoBody-CD40x4-1BB Development: Next to the Clinic

Innovation Powerhouse: Cutting Edge Proprietary Technologies

Technology		Principle	Applications
DuoBody	8	Bispecific antibodies	Dual targeting: - Recruitment (e.g. T cells) - Tumor heterogeneity
HexaBody	90000	Target-mediated enhanced hexamerization	Enhanced potency:- CDC- Target clustering, outside-in signaling, apoptosis
DuoHexaBody	3000	Bispecific antibodies with target- mediated enhanced hexamerization	Dual targeting + enhanced potency - CDC - Target clustering, outside-in signaling, apoptosis
HexElect		Two co-dependent antibodies with target-mediated enhanced hexamerization	Dual targeting + enhanced potency & selectivity: - Co-dependent unlocking of potency - New target space, previously inaccessible

Genmab's Commitment to Society

Corporate Social Responsibility (CSR)

Anchored in our Core Purpose & Vision

Focus on four main areas

- Employee well-being, including health, safety & development
- Ethics in relation to pre-clinical and clinical studies
- Environment, including waste management & recycling
- Business ethics & transparency

CSR Committee comprised of representatives from variety of functions

 Ensures that Genmab carries out CSR activities effectively & communicates clearly and openly

Tisotumab Vedotin Cervical Cancer Market Size

United States³

New Diagnoses Deaths 12,578 4,115

3rd most common gynecologic cancer in US⁴

Japan⁶

New Diagnoses Deaths 9,390 3,654

2nd most common gynecologic cancer in Japan⁶

Europe²

New Diagnoses Deaths 58,373 24,404

3rd most common gynecologic cancer in Europe^{2*}

In developed countries, incidence rates are low (<7.9 per 100,000 women) compared with *developing countries* in sub-Saharan Africa and Central and South America, where incidence is especially high *(>30 per 100,000 women)*⁵
