Innovating Antibodies, Improving Lives

Investor Presentation
June 2020

Forward Looking Statement

This presentation contains forward looking statements. The words "believe", "expect", "anticipate", "intend" and "plan" and similar expressions identify forward looking statements. All statements other than statements of historical facts included in this presentation, including, without limitation, those regarding our financial position, business strategy, plans and objectives of management for future operations (including development plans and objectives relating to our products), are forward looking statements. Such forward looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward looking statements. Such forward looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which we will operate in the future. The important factors that could cause our actual results, performance or achievements to differ materially from those in the forward looking statements include, among others, risks associated with product discovery and development, uncertainties related to the outcome of clinical trials, slower than expected rates of patient recruitment, unforeseen safety issues resulting from the administration of our products in patients, uncertainties related to product manufacturing, the lack of market acceptance of our products, our inability to manage growth, the competitive environment in relation to our business area and markets, our inability to attract and retain suitably qualified personnel, the unenforceability or lack of protection of our patents and proprietary rights, our relationships with affiliated entities, changes and developments in technology which may render our products obsolete, and other factors. Further, certain forward looking statements are based upon assumptions of future events which may not prove to be accurate. The forward looking statements in this document speak only as at the date of this presentation. Genmab does not undertake any obligation to update or revise forward looking statements in this presentation nor to confirm such statements to reflect subsequent events or circumstances after the date made or in relation to actual results, unless required by law.

Our Core Purpose, Strategy & Vision Guide Our Work

Core Purpose

To improve the lives of patients by creating & developing innovative antibody products

Our Strategy

Turn science into medicine

Build a profitable & successful biotech

Focus on Core Competence

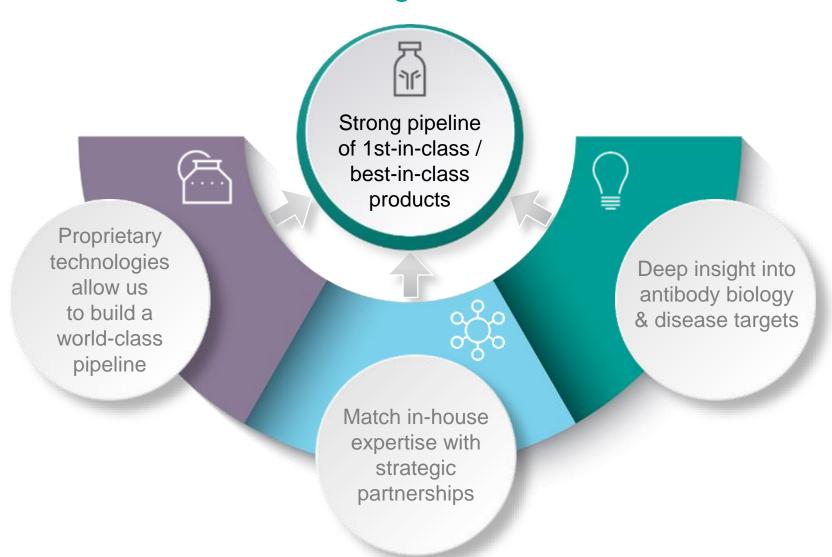

By 2025, our own product has transformed cancer treatment and we have a pipeline of knock-yoursocks off antibodies

The Genmab Difference

Innovation Powerhouse Transforming Cancer Treatment & Creating Value

Solid Foundation Built on a Differentiated Pipeline

Potential 1st-in-Class/Best-in-Class

Our Own Clinical Pipeline

- Tisotumab Vedotin⁴
- Enapotamab Vedotin
- HexaBody®-DR5/DR5
- Epcoritamab (DuoBody®-CD3xCD20)⁵
- DuoBody-CD40x4-1BB⁶
- DuoBody-PD-L1x4-1BB⁶
- DuoHexaBody®-CD37⁵

R&D Engine Technologies & Pre-Clinical

- DuoBody technology
- · HexaBody technology
- HexElect® technology
- DuoHexaBody® technology
- Rich Pre-Clinical Pipeline incl. DuoBody-CD3x5T4⁵ & HexaBody-CD38⁸

Solid Financial Base

Approved Partnered Products

- •DARZALEX® (daratumumab) / DARZALEX *FASPRO™* (daratumumab and hyaluronidase-fihj)¹
- •Arzerra® (ofatumumab)2
- •TEPEZZA™ (teprotumumab)³

Programs Built on Genmab's Innovation

Partner-owned Programs in the Clinic

- 11 product candidates in clinical development w/ partners
- Incl. 6 DuoBody products with Janssen, 1 with Novo Nordisk
- Ofatumumab⁷ (RMS)

DARZALEX[®] (daratumumab) & DARZALEX *FASPRO*™ (daratumumab and hyaluronidase-fihj): Redefining Treatment of Multiple Myeloma

First-in-class CD38 antibody in development to treat cancer

Collaboration with Janssen: Genmab entitled to tiered royalty of 12-20% of net sales

Approved in certain territories for various multiple myeloma (MM) indications¹

DARZALEX *FASPRO* first and only SC CD38 mAb approved in U.S. for treatment of MM

2019 WW net sales by J&J: \$2,998M

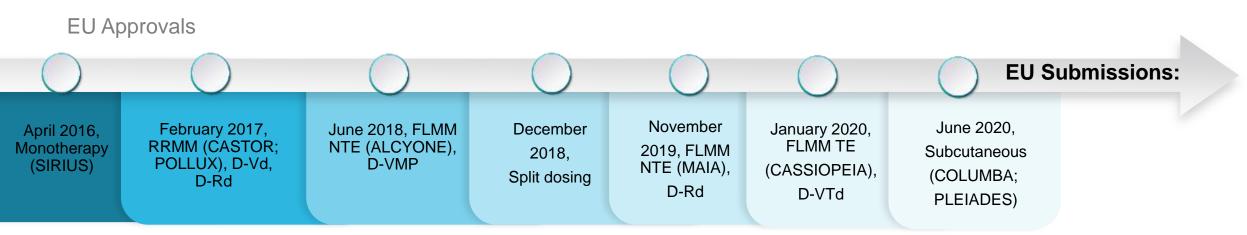

DARZALEX Approvals: US and EU

On Track for Approval Across All Lines of MM Treatment

US Approvals

US Submissions: May 2020, November June 2017, May 2018, November September 2019, June 2019, 2016, RRMM DARZALEX FASPRO • RRMM (D-Kd) Feb. 2020 February 2019, **RRMM** FLMM NTE 2015, FLMM TE (CASTOR: FLMM NTE (COLUMBA; (ALCYONE), Split dosing (EQUULEUS), Monotherapy (CASSIOPEIA), POLLUX), (MAIA), D-Rd PLEIADES) D-Pd D-VMP D-Vd, D-Rd (SIRIUS) D-VTd Subcutaneous

Daratumumab

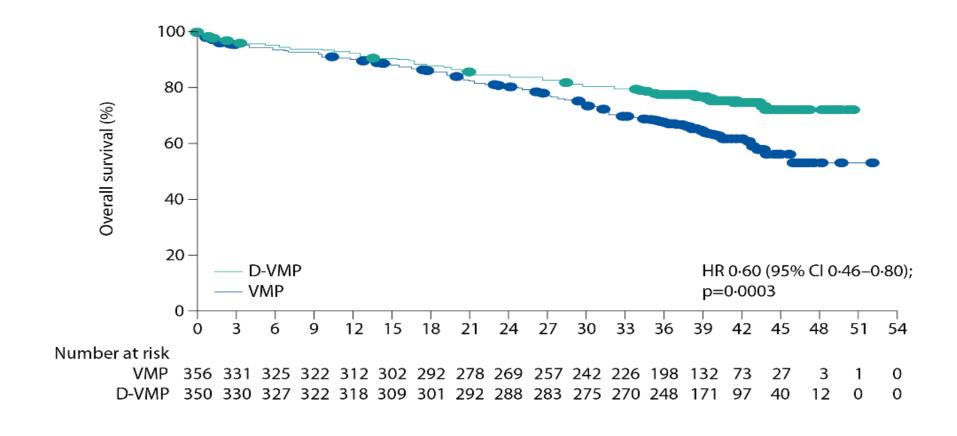

Proving to be the Critical Driver Across Different Combinations & Treatment Lines

Ongoing Phase 3: APOLLO (D-Pom-d, RRMM), CEPHEUS (D-VRd, NDMM NTE), PERSEUS (D-VRd, NDMM TE)

Improved Survival for Patients with Multiple Myeloma Overall Survival Analysis from ALCYONE Trial

Ofatumumab (OMB 157)

Potential in Relapsing Multiple Sclerosis

Human CD20 Antibody – well validated target

Positive data Phase 3 (ASCLEPIOS I&II) relapsing multiple sclerosis (RMS) Primary and key secondary endpoints met

ASCLEPIOS I&II: SubQ dosing, 20mg monthly after initial dosing on weeks 0, 1 and 2

Developed by Novartis: Regulatory submissions made in US & EU

Genmab 10% royalty payment of net sales

Second Genmab-created product with blockbuster potential

Tisotumab Vedotin

Genmab's Most Advanced Asset with Potential in Solid Tumors

Fully human antibody-drug conjugate (ADC) targeting Tissue Factor (TF) in development to treat solid tumors

License and collaboration agreement with Seattle Genetics 50:50

Cervical cancer:

Ph 2 innovaTV 204 - potentially pivotal Ph 1/2 innovaTV 205 - combo

Ph 2 innovaTV 207 trial multiple solid tumors

Ph 2 innovaTV 208 trial in ovarian cancer

Expanding development, additional studies planned

Tisotumab Vedotin in Cervical Cancer

Designed to Address a High Unmet Medical Need

Recurrent or metastatic cervical cancer

- Poor prognosis advanced / recurrent cervical cancer
 - RR standard therapies generally <15%
 - Median OS 6-8 months
- Data ORR & survival after progression on 1L bevacizumab + doublet chemotherapy are limited

Conclusions*

(previously treated recurrent or metastatic cervical cancer)

- Manageable AEs + encouraging antitumor activity
- ORR 35% (confirmed + unconfirmed, IRC)
- Confirmed ORR 22%
- Median DOR 6.0 months
- 6-month PFS of 40%

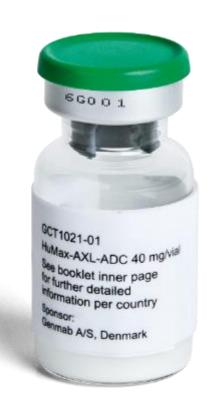

Encouraging Antitumor Activity Observed*

Enapotamab Vedotin

Potential in Solid Tumors

Fully human ADC, targets tumor-associated AXL

AXL over-expressed on many resistant tumors

Ph 1/2 study ongoing solid tumors Expansion cohorts recruiting

ADC technology license from Seattle Genetics

Fully owned by Genmab

Genmab & AbbVie: Collaboration Overview

A broad, long-term oncology collaboration with Genmab and AbbVie working together to jointly make all strategy, clinical development and commercialization decisions

50/50 partnership across three clinical nextgeneration bispecific antibody product candidates (epcoritamab, DuoHexaBody-CD37, DuoBody-CD3x5T4)

Genmab to book epcoritamab sales in the U.S. and Japan; AbbVie to commercialize epcoritamab RoW - Genmab to receive tiered royalties on RoW net sales

Worldwide co-commercialization and profit split of all other programs

Discovery Research Collaboration

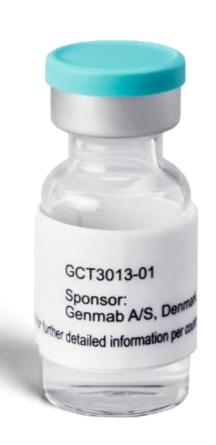

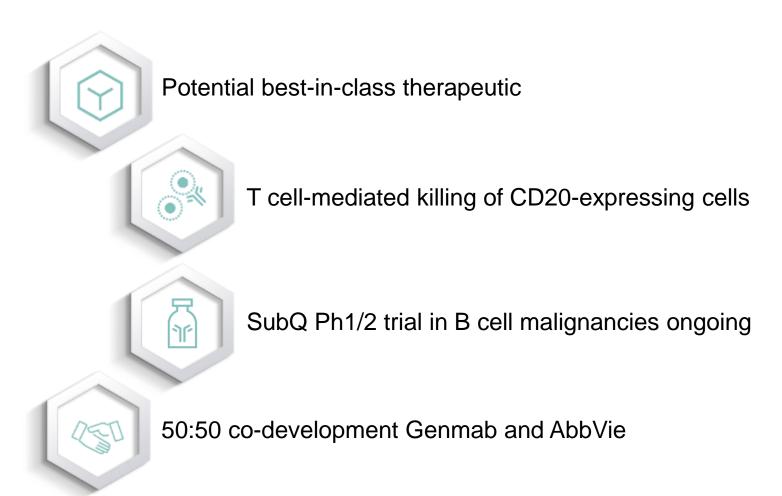

Fourth* largest oncology partnership with total potential value ~USD 3.9bn (up-front cash + milestone payments) to Genmab

Epcoritamab (DuoBody-CD3xCD20)

Potential for Improved Efficacy & Safety in B Cell Malignancies

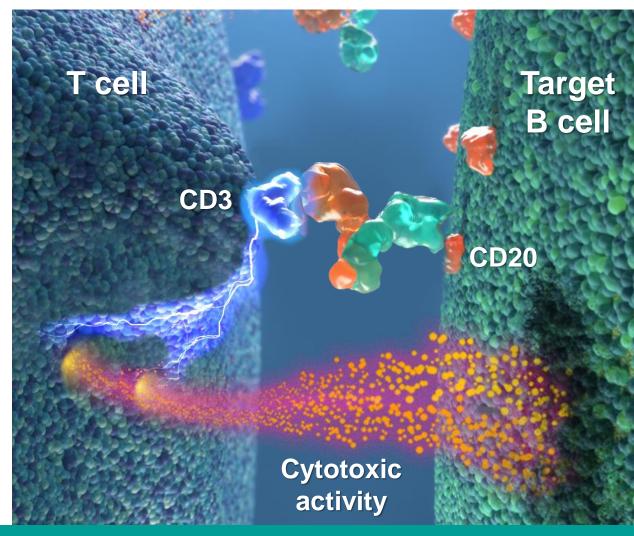

Epcoritamab: Complete Dose Escalation Data Presented at ASCO20*

Anti-tumor activity

- 86% ORR in FL ≥ 0.76mg
- 50% ORR, incl. 3 pts who failed prior CAR-T treatment, in DLBCL/HGBCL ≥12 mg
- Improved efficacy at higher dose levels
- Prelim. data show substantial single-agent efficacy

Safety

- Most AEs mild to moderate, transient, and reversible
- No DLTs observed; MTD has not been reached
- No Grade ≥ 3 CRS events observed
- No tumor lysis syndrome or CRS-related neurological toxicities observed

Dose-escalation data with subcutaneous epcoritamab indicate potential for best-in-class therapy

DuoHexaBody-CD37 (GEN3009)

Building Our Pipeline: First DuoHexaBody in the Clinic

Combination of DuoBody & HexaBody platforms

Novel target for hematologic malignancies

Unique mechanism-of-action

Dose escalation ongoing

50:50 co-development Genmab and AbbVie

DuoBody-PD-L1x4-1BB (GEN1046)

Bispecific Next Generation Checkpoint Immunotherapy

Bispecific antibody targeting PD-L1 & 4-1BB (CD137)

Potential as differentiated Genmab PD-L1 product

Combining checkpoint blockade with T cell stimulation

Ph 1/2 study ongoing in solid tumors

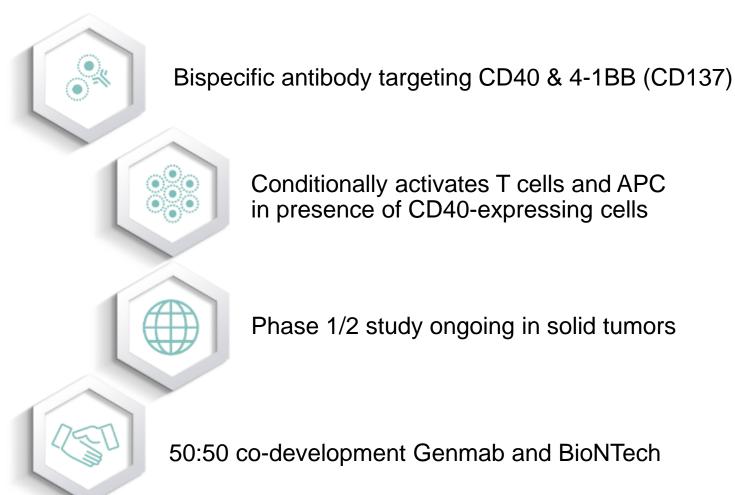

50:50 co-development Genmab and BioNTech

DuoBody-CD40x4-1BB (GEN1042)

Bispecific Agonistic Antibody

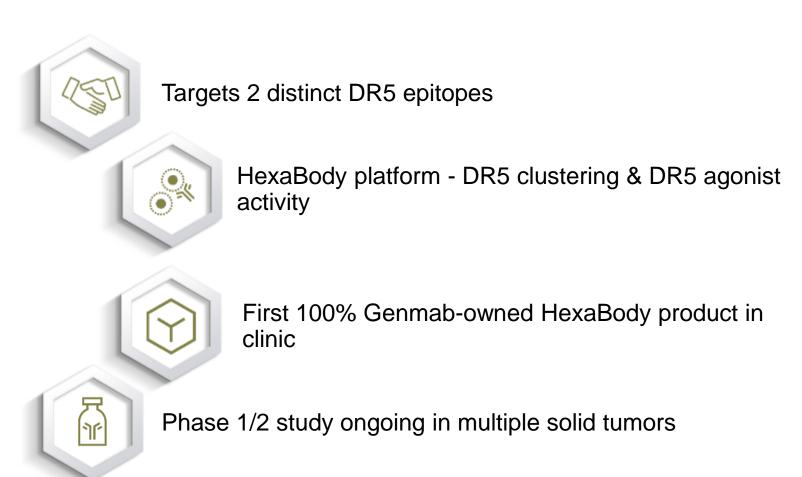

HexaBody-DR5/DR5 (GEN1029)

First HexaBody in Clinical Development

Well-Capitalized Biotech – 2020 Guidance*

Key 2020 Priorities

Building a Strong Differentiated Product Pipeline

Priority	✓	Targeted Milestones
Genmab proprietary* products	✓	 » Tisotumab vedotin¹ - Phase 2 innovaTV 204 safety & efficacy analysis in recurrent/metastatic cervical cancer and engage U.S. FDA for BLA submission subject to trial results » Tisotumab vedotin - data on other solid tumor types » Enapotamab vedotin - data to support late stage development » Epcoritamab (DuoBody-CD3xCD20) Phase 1/2 - decision on recommended Phase 2 dose & initiate expansion cohorts » HexaBody-DR5/DR5 Phase 1/2 - advance dose escalation » DuoBody-PD-L1x4-1BB² Phase 1/2 - initiate expansion cohorts » DuoBody-PD-L1x4-1BB initial data in H2 2020 » File INDs and/or CTAs for 2 new products
Daratumumab ³	✓	 U.S. FDA and EMA decision on Phase 3 COLUMBA multiple myeloma SubQ submission sBLA and MAA Submission Phase 3 ANDROMEDA amyloidosis sBLA and MAA submission Phase 3 APOLLO multiple myeloma
Ofatumumab ⁴		» U.S. FDA decision on regulatory dossier submission in multiple sclerosis
Teprotumumab ⁵	✓	» U.S. FDA decision on Phase 3 OPTIC active thyroid eye disease submission

Delivering on Genmab's Promise:

Innovating Antibodies, Improving Lives

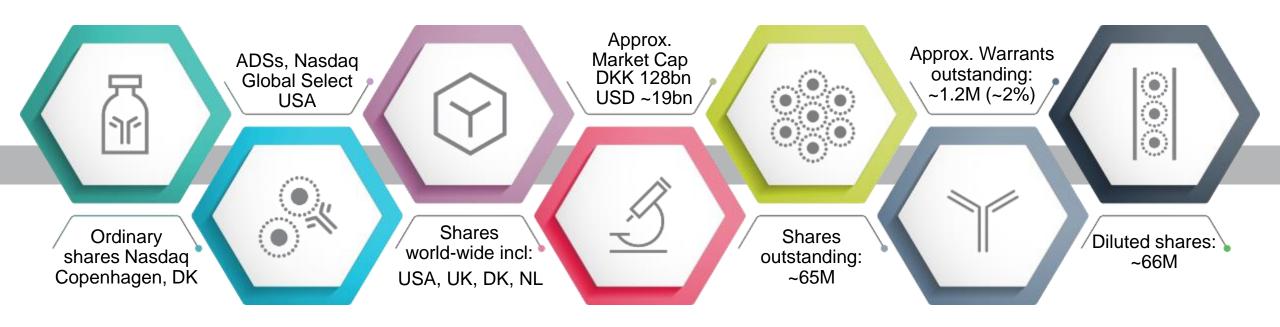

Developing new capabilities to bring own product to market Pipeline of 1st-in-class / best-in-World-class team with class therapies advancing track record of success through clinic **Creating Substantial Value** Significant earnings potential Unique R&D engine & from marketed products strategic alliances

Innovating Antibodies, Improving Lives

A Leading International Biotech With Large Free Float

As of June 10, 2020

Advancing Pipeline: Delivering on Our Promise & Creating Value Accelerating Development of Potential "Next Winners"

DuoBody-CD3xCD20 (epcoritamab)

- Potential best-in-class: SubQ administration
- Pre-clinical / preliminary clinical data shows encouraging safety & efficacy
- Expeditious and comprehensive clinical development plan
- RP2D decision & expansion cohorts initiation
- 50/50 co-development Genmab and AbbVie

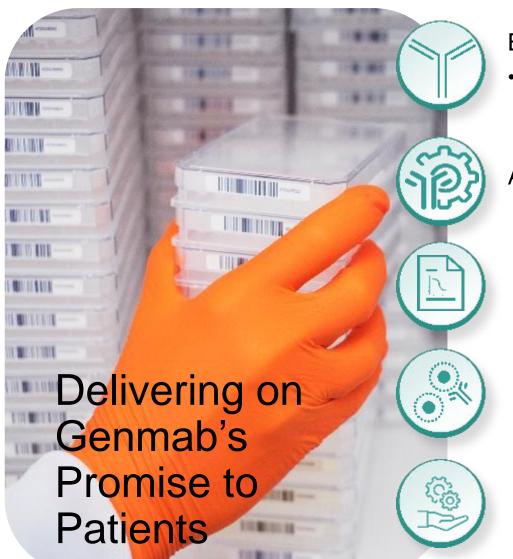

DuoBody-PD-L1x4-1BB (GEN1046)

- Potential first-in-class: Next generation IO
- Unmet medical need
- FiH clinical study: escalation phase is ongoing
- 50:50 BioNTech

Track Record of Success

Advancing Pipeline: Delivering on Our Promise & Creating Value

Bolstering early stage portfolio

•DuoBody-CD40x4-1BB¹; DuoHexaBody-CD37²; DuoBody-CD3x5T4²; HexaBody-CD38³

Adding new technologies

Data sciences

Expanding early stage discovery programs

Enhancing clinical development capabilities

Track Record of Success

Genmab's Commitment to Society

Building a Socially Responsible & Sustainable Company

Anchored in our Core Purpose & Vision

- To improve the lives of patients by creating and developing innovative antibody products
- By 2025 our own product has transformed cancer treatment and we have a pipeline of knock-your-socksoff antibodies

CSR Committee comprised of representatives from variety of functions, chaired by CEO

- Ensures that Genmab carries out CSR activities effectively & communicates clearly and openly
- Focus on Environment, Society and Governance reporting

Focus on four main areas

- Employee well-being, including health, safety & development
- Ethics in relation to pre-clinical and clinical studies
- Environment, including waste management & recycling
- Business ethics & transparency

Innovation Powerhouse: Cutting Edge Proprietary Technologies

Technology	Principle	Applications
DuoBody	Bispecific antibodies	Dual targeting
HexaBody	Target-mediated enhanced hexamerization	Enhanced potency
DuoHexaBody	Bispecific antibodies with target- mediated enhanced hexamerization	Dual targeting + enhanced potency
HexElect	Two co-dependent antibodies with target-mediated enhanced hexamerization	Dual targeting + enhanced potency & selectivity

Solid Foundation Built on a Differentiated Pipeline

Tisotumab Vedotin Clinical Program

Recurrent or metastatic cervical cancer

- Potentially registrational 102 pts
- Single arm, monotherapy
- 1° endpoint: confirmed ORR
- 2° endpoints: duration of response, PFS, OS

Recurrent or metastatic cervical cancer

• In combo or mono

w/ bevacizumab, pembrolizumab, or carboplatin or weekly monotherapy recurrent or stage IVB cervical cancer

- Up to 170 pts
- 1° endpoint: ORR
- 2° endpoints: Safety, duration of response, time to response, PFS, OS

Solid tumors

- Basket study
- Up to 250 pts
- Single arm, monotherapy
- 1° endpoint: ORR
- 2° endpoints: Safety, disease control rate, duration of response, time to response, PFS, OS

Ovarian cancer

- Ovarian cancer, fallopian tube cancer, peritoneal cancer
- Up to 182 pts, incl 12 pt safety run-in
- Monotherapy
- 2 schedules: q3wk & dose dense
- 1° endpoints: Safety & ORR

Tisotumab Vedotin

Cervical Cancer Market Size

United States³

New Diagnoses Deaths 12,578 4,115

3rd most common gynecologic cancer in US⁴

Japan⁶

New Diagnoses Deaths 9,390 3,654

2nd most common gynecologic cancer in Japan⁶

Europe²

New Diagnoses Deaths 58,373 24,404

3rd most common gynecologic cancer in Europe^{2*}

In developed countries, incidence rates are low (<7.9 per 100,000 women) compared with *developing countries* in sub-Saharan Africa and Central and South America, where incidence is especially high *(>30 per 100,000 women)*⁵

DuoBody-CD3x5T4 (GEN1044) IND Filed in 2020

Based on proprietary DuoBody technology

CD3 bispecific, T cell mediated cytotoxicity of 5T4+ tumor cells

5T4 expressed on multiple solid tumors limited expression in healthy tissue

Potent anti-tumor activity in diversity pre-clinical models

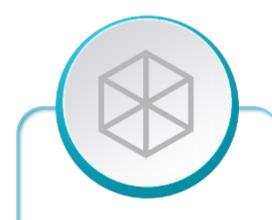

50:50 co-development Genmab and AbbVie

HexaBody-CD38 (GEN3014)

Expanding the Potential of CD38 Antibodies

Incorporates proprietary HexaBody technology

Highly promising data pre-clinical models for MM, lymphoma & AML

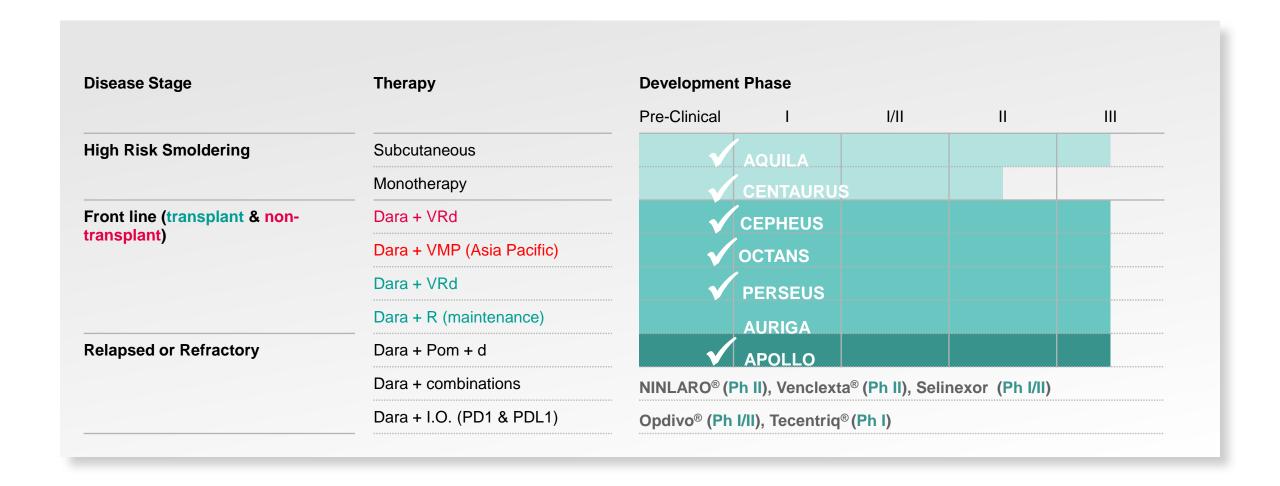

Could potentially add to and broaden DARZALEX franchise

IND/CTA planned in H2 2020

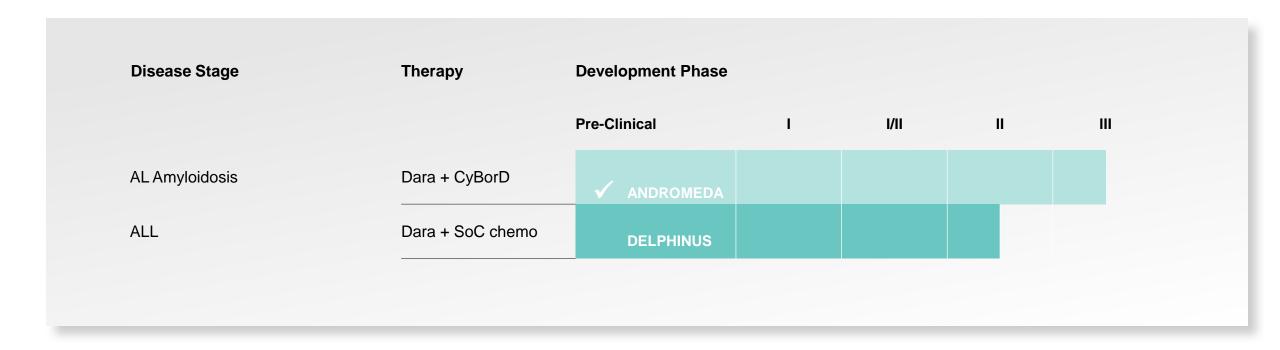

Covering All Stages of MM: Key Ongoing* Industry Sponsored Trials

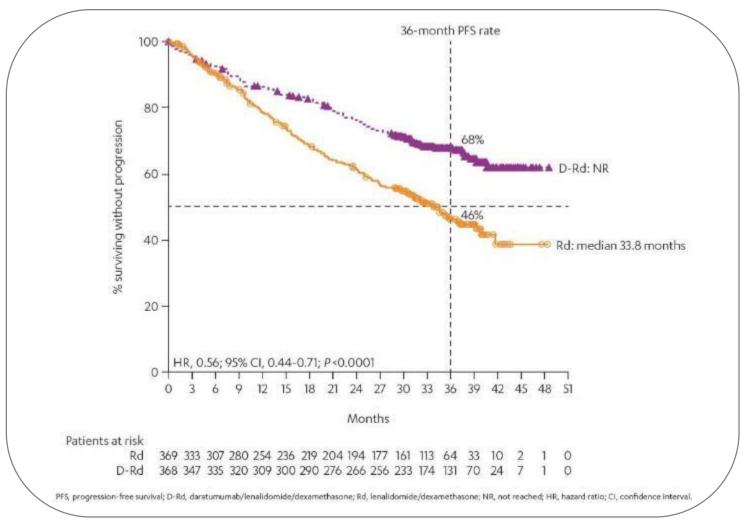

Daratumumab Development: Beyond Multiple Myeloma

Daratumumab Efficacy in Newly Diagnosed Multiple Myeloma Updated Phase 3 MAIA Trial (D+Rd, NTE): ASH Dec 2019

- Median PFS not reached in D-Rd arm
- MRD-negativity significantly higher with D-Rd vs. Rd (29% vs 9%; P<0.0001)
- No new safety concerns
- Results continue to support use of D-Rd in 1st line treatment of TIE pts with NDMM

Ongoing Daratumumab Clinical Trials

Janssen Sponsored Phase 3 & 4

Daratumumab Trials Sponsored by Pharma / Biotech
